

Project Demo Planning

Date	1 October 2026
Team ID	SWTID-2026-4934
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	1 Mark

Project Demo Planning:

This plan shows how the team presents the Client Script & UI Policy (Incident) solution in about five minutes: introduction, the UI Policy, the Client Scripts, two live tests and closing, with one member responsible for each section.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Project name, team and the problem: incomplete or inconsistent Incident data can be submitted when only manual checks are used	0.5	Rashmi P P
2	UI Policy & Actions	High Impact Control: condition Impact is 1 - High, Reverse if false, Assignment group mandatory and Urgency read-only	1	Ravichandran
3	Client Scripts	The onChange, onSubmit and onCellEdit scripts in System UI → Client Scripts and what each one does	0.75	Rishikesh MB
4	Live Test: Incident Form	Create a new Incident, set Impact to High, show Urgency set automatically, try to submit without Assigned to, then save with a user selected	1.25	Rubika Sakthi M
5	Live Test: Reverse & List Edit	Change Impact to Medium, double-click State in the list to show the alert, then change State from the form	1	Rohith Srinivasan
6	Closing & Future Scope	Summary of the solution and planned improvements (reset Urgency, role-based exceptions, server-side controls)	0.5	Rashmi P P

Total planned demo time: about 5 minutes. Demo recording: [link to be added by the team](#)

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Instance ready and logged in before recording (instance URL to be confirmed)
2	Solution Overview	The "High Impact Control" UI Policy with its two actions and the three Client Scripts are shown in ServiceNow
3	Live Feature Demonstration	A High impact Incident is created live: Urgency is set, the save is blocked and then allowed, the reverse condition and the list edit block are shown
4	Q&A Session	Team answers questions about the rules, the scripts and future improvements
