

User Acceptance Testing (UAT) Template

Date	1 October 2026
Team ID	SWTID-2026-4934
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Project Overview:

Project Name: Implement Client Script & UI Policy (Incident)

Project Description: Client-side controls on the ServiceNow Incident form. A UI Policy and three Client Scripts make Assignment group mandatory and Urgency read-only for High impact, auto-set Urgency, block saving when Assigned to is empty, and block State edits from the list view.

Project Version: 1.0

Testing Period: 28 September 2026 (date shown on the test incident records)

Testing Scope:

Features tested: UI Policy High Impact Control with its Assignment group and Urgency actions; Reverse if false; onChange script (Auto set urgency for high impact); onSubmit script (Prevent save if Assigned To missing); onCellEdit script (Prevent state change via list edit).

Requirements tested: FR1-FR7 of the project report (conditional mandatory field, read-only Urgency, auto-set Urgency, save-time validation, list-edit blocking, form-based State update still allowed).

Testing Environment:

URL/Location: ServiceNow developer instance, Incident [incident] table (Incident → Create New / Open / All).

Credentials (if required): Administrator or configuration access user (credentials not recorded in this document).

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Mandatory enforcement	1. Incident → Create New. 2. Set Impact to 1 - High. 3. Leave Assigned to empty. 4. Click Submit.	Record is not saved; error message appears for Assigned to.	Save blocked; "Assigned To is mandatory for High impact incidents." shown under Assigned to. Urgency 1 - High read-only; Assignment group mandatory.	Pass
TC-002	Successful save	1. Select a user in Assigned to. 2. Click Submit.	Record is saved without errors.	With Beth Anglin as Assigned to, no error; INC0010012 created and listed.	Pass
TC-003	Reverse condition	1. Open an incident with High impact. 2. Change Impact to Medium. 3. Save.	Assigned to not enforced; Urgency editable; record saves.	At 2 - Medium, Assigned to could stay empty and Urgency was editable again.	Pass
TC-004	List edit blocking	1. Open Incident list. 2. Double-click State of a record.	Alert appears; State unchanged.	Alert "State cannot be changed from the list. Please open the Incident." shown; edit cancelled.	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-005	Form-based update	1. Open the incident. 2. Change State. 3. Click Update.	State change is saved.	INC0008111 updated to In Progress from the form; list showed new State.	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	No functional defects found in TC-001 to TC-005.	Not applicable	Low	Closed	All five test cases passed.
BG-002	Urgency is not reset when Impact is lowered from High to Medium (field only becomes editable).	Set Impact High, then change to Medium and check Urgency.	Low	Open	Enhancement: reset Urgency when Impact is lowered.
BG-003	Assigned to is only enforced on Submit; it is not marked mandatory on the form.	Set Impact High and look at Assigned to before clicking Submit.	Low	Open	Enhancement: show Assigned to as mandatory for High impact.
BG-004	State list edit is blocked for every user, including those who may need it.	Double-click State in the list as any user.	Low	Open	Enhancement: add role-based exception.
