

Acceptance Testing UAT Execution & Report Submission

Date	1 October 2026
Team ID	SWTID-2026-4934
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the Implement Client Script & UI Policy (Incident) project at the time of the release to User Acceptance Testing (UAT). The project uses a ServiceNow UI Policy (*High Impact Control*), UI Policy Actions and three Client Scripts (onChange, onSubmit, onCellEdit) to enforce data integrity on Incident records.

2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	0	0	0	0
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	0	0	0	0

Open issues at release to UAT: No Severity 1, 2 or 3 defects were raised. Three low-severity (Severity 4) observations remain open and are recorded in the UAT document: BG-001 (Urgency does not revert when Impact changes from High to Medium), BG-002 (Task 3 script text differs from the configured script) and BG-003 (onSubmit script checks Assigned To only when Impact is High). None of them blocks the release.

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and untested

Section	Total Cases	Not Tested	Fail	Pass
UI Policy & UI Policy Actions (High Impact Control)	3	0	0	3
onChange Client Script (Urgency auto-set)	1	0	0	1
onSubmit Client Script (Save validation)	2	0	0	2
onCellEdit Client Script (List edit blocking)	1	0	0	1
Form-based State Update	1	0	0	1

Total: 8 test cases executed, 0 not tested, 0 failed, 8 passed. Test cases TC-001 to TC-008 are detailed in the UAT document, covering both positive and negative scenarios.
