

No. of Functional Features Included in the Solution

Date	1 October 2026
Team ID	SWTID-2026-4934
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	5 Marks

Functional Features Overview:

This document lists the seven functional features of the Incident client-side solution, from the High Impact Control UI Policy to the State update from the form. For each feature it gives the purpose, implementation status and marks contribution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	High Impact Control UI Policy	UI Policy on the Incident table (Order 100) that applies its actions while Impact is 1 - High	UI Policy	Done	0.75
2	Conditional Mandatory Assignment Group	Assignment group becomes mandatory while Impact is High; Reverse if false returns it to normal when Impact is lowered	UI Policy Action	Done	0.75
3	Read-only Urgency	Urgency is locked as read-only while Impact is High; Visible and Mandatory are left unchanged	UI Policy Action	Done	0.5
4	Auto-set Urgency	When Impact is changed to High, Urgency is set to 1 - High and an information message is shown	Client Script (onChange)	Done	0.75
5	Save Validation for Assigned To	Saving is blocked when Impact is High and Assigned to is empty, with an error shown under Assigned to	Client Script (onSubmit)	Done	1.0
6	State Edit Block in List View	An alert is shown and the edit is cancelled when State is changed directly in the list	Client Script (onCellEdit)	Done	0.75
7	State Update from the Form	State can still be changed and saved from the Incident form	Incident Form	Done	0.5

Feature Summary:

Metric	Count / Value
Total Features Planned	7
Total Features Implemented	7 (all features Done)
Core / Must-Have Features	5 (features 1, 2, 4, 5, 6)
Additional / Nice-to-Have Features	2 (features 3, 7)
Features Tested & Verified	7 (features 1 to 7, checked with test cases TC-01 to TC-05)

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	4	High Impact Control policy, mandatory Assignment group, read-only Urgency, State update from the form
2	Backend / Logic	3	Client scripts: auto-set Urgency, save validation, list-edit block (client-side only, no server-side logic yet)
3	Database / Storage	0	None; uses the standard Incident [incident] table with no new tables or fields
4	API / Integration	0	None (built-in ServiceNow features only)
5	Security / Authentication	0	Uses standard ServiceNow login and roles (not customized)
