

Team Involvement in Demonstration

Date	1 October 2026
Team ID	SWTID-2026-4934
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	1 Mark

Team Involvement in Demonstration:

This document records the part each team member played in the demo of the Client Script & UI Policy (Incident) solution, the section each one presented, and how the team coordinated.

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation (Active / Passive)
1	Rashmi P P	Presenter / Coordinator	Introduction; Closing	Introduced the project and the problem; summarised the solution and future scope	Active
2	Ravichandran	Presenter	UI Policy & Actions	Showed the High Impact Control UI Policy, its condition, Reverse if false and the two actions	Active
3	Rishikesh MB	Presenter	Client Scripts	Explained the onChange, onSubmit and onCellEdit scripts and what each one does	Active
4	Rubika Sakthi M	Tester	Live Test: Incident Form	Created a High impact incident live and showed Urgency set automatically, the blocked save and the successful save	Active
5	Rohith Srinivasan	Verifier	Live Test: Reverse & List Edit	Changed Impact to Medium and showed the list-edit alert and the State change from the form	Active

Team Coordination Notes:

Aspect	Details
Team Leader / Coordinator	Rashmi P P
Overall Team Coordination Rating (1-5)	4
Any issues during demo	While showing the UI Policy Action for Urgency, ServiceNow displayed a warning that more than one UI Policy (High Impact Control and the built-in "Make fields read-only on close") had the same Order for the Urgency field, so their run order was not predictable. There was a concern that Urgency might not lock reliably during the live test.
How issues were resolved	The other policy was opened and checked; it applies only to closed incidents, so its condition never overlaps with Impact being 1 - High. The High impact test was repeated and Urgency stayed read-only every time, so the warning was treated as informational and the policy order was left unchanged.
